Introduction

Generation Investment Management was accepted by the UK Financial Reporting Council (FRC) in 2021 as one of the initial signatories to the UK Stewardship Code 2020.

This report covers the calendar year 2024 and has been reviewed by Generation's Management Committee.

The report is structured around the 12 Principles of the Stewardship Code. Under each of the Principles, you will see the Principle itself set out. You will then find disclosure of Generation's stewardship 'Activity' before our reporting of the stewardship 'Outcome.' For some but not all of the Principles, the Code asks that reporting of activity and outcomes is preceded by disclosure of 'Context.'

As in previous years, content specific to the reporting year is shown in teal. This is to help you identify disclosure of activities and outcomes from 2024, as distinct from disclosure of Generation's general approach to stewardship that has not changed materially from prior years.

The UK Stewardship Code is currently being fundamentally reviewed by the FRC and this is the last year of reporting under the UK Stewardship Code 2020. Pending the introduction of a new Code, the FRC has taken steps to reduce the reporting burden on signatories to the Code, as follows:

- New 'Context' reporting is required only where there have been material changes.
- 'Activity' and 'Outcome' reporting for Principles 1, 2, 5 and 6 is required only where there are material updates.

In the absence of material updates, we refer you to last year's report.

We welcome your feedback on this report.

David Blood, Senior Partner

Purpose and Governance

Principle 1: Purpose, strategy and culture

Signatories’ purpose, investment beliefs, strategy and culture enable stewardship that creates long-term value for clients and beneficiaries leading to sustainable benefits for the economy, the environment and society.

Context No material changes. Please see [last year’s report](#).

Activity No material updates. Please see [last year’s report](#).

Outcome No material updates. Please see [last year’s report](#).

Principle 2: Governance, resources and incentives

Signatories' governance, resources and incentives support stewardship.

Activity

Material updates since last year's report are:

- The Operating Committee has been stood down in order to simplify our governance structures.
- Stewardship resourcing at Just Climate has grown with the appointment of two Associates supporting the Managing Director, Climate Finance, on climate and nature impact across the investment process, including prioritisation of research and pipeline for highest impact, environmental and social due diligence, portfolio value creation activities covering implementation of best practice impact management, and impact measurement and disclosure to clients.

Outcome

No material updates. Please see [last year's report](#).

Principle 3: Conflicts of interest

Signatories manage conflicts of interest to put the best interests of clients and beneficiaries first.

Context

No material changes. Please see [last year's report](#).

Activity

The only potential conflicts of interest related to stewardship identified continue to relate to non-executive positions at non-governmental organisations held by Generation Partners.

In the booklet on our climate disclosure and action expectations that Generation shares with public and private markets companies, we disclose the following interests:

- When referring to our support for the Science Based Targets initiative, we note that David Blood, Senior Partner, is Chair of the Board of Directors of the World Resources Institute, one of the collaborators in the Science Based Targets initiative.
- When noting that Conservation International (CI) and The Nature Conservancy (TNC) are resources for investment in nature-based solutions, we note that Mark Ferguson, co-Chief Investment Officer, sits on CI's Board of Directors and that John Bernstein, a senior investor at Generation's Private Equity strategy, sits on TNC's Global Board.
- When recommending The Climate Reality Project as a resource for information on the climate crisis, we note that it was founded by Generation's Chairman, Al Gore.

Outcome

We adopt a precautionary approach to disclosure in these instances, as a method of managing the potential that these directorships at non-governmental organisations could be perceived as conflicts of interest.

Principle 4: Promoting well-functioning markets

Signatories identify and respond to market-wide and systemic risks to promote a well-functioning financial system.

Activity

Generation was founded in response to concerns about the detrimental impact on investment returns of market-wide and systemic risks that arise out of short-termism and the failure to integrate sustainability considerations into investment analysis and stewardship.

Working to address these risks and to improve the functioning of financial markets is intrinsic to Generation's purpose. Activities are conducted both by the firm itself and by the Generation Foundation, which is wholly funded from Generation's profits.

The Management Committee is the relevant decision-making body for the identification of issues and risks for advocacy. Our Chairman Al Gore and Senior Partner David Blood play particularly key roles given their leadership of Generation's advocacy activities and their deep knowledge of the climate crisis and investment system respectively. In determining systemic issues and risks, members of the committee draw not only on their investment insight and interactions in the financial sector, but also on scientific, political and economic insight, including from their non-profit roles. Decisions are framed by Generation's overriding belief in the need for sustainability to be the organising construct of the economy.

Some decisions are taken proactively by the Management Committee with a view to increasing the impact of our advocacy activities, for example recruiting externally a senior leader in sustainable finance as Chair of the Generation Foundation in 2024.

Other decisions are taken reactively, for example decisions to sign investor statements that are typically made on the recommendation of colleagues responsible for stewardship. The commissioning of Insights pieces is led by one of the co-Chief Investment Officers, who seeks to ensure that we are bringing forward insights that are decision-useful for the investment community.

The Generation Foundation has its own Board of Trustees.

Generation's market impact initiatives 2024

As a small firm we must focus, motivate and collaborate with others. Leveraging our core strengths of investment performance, differentiated research, 20+ years of experience as a firm and convening power, we pursued the following initiatives in 2024 to promote a sustainable financial system:

Sustainability Trends Report (STR)

We published our eighth annual **Sustainability Trends Report** in 2024.

The report is intended to be a 'go-to' annual resource for information on the state of sustainability. Our aim is to aggregate and share insights that governments, businesses and investors can use to ensure a net-zero, prosperous, equitable, healthy and safe society.

The 2024 report called out how far the world is off track to meet its climate promises. We promoted the report's findings through several activities, including a social media campaign.

Sustainability Insights

Our **Insights** series shares lessons drawn from our investment work in the form of publicly available articles. In 2024, we published three pieces covering the following topics: Is AI Sustainable?, Why Healthcare Is Unsustainably Expensive – and What We Can Do About It, and The Global Spread of Sustainability Disclosure.

Is AI Sustainable?
As sustainable investors, we think of the wider costs and benefits of new technologies.

INSIGHTS 26 NOV 2024

The Generation Foundation

Founded with the firm in 2004, the **Generation Foundation** continues to pursue its shared vision with Generation Investment Management through grant-making, research and partnerships, deploying over GBP 9.5 million in 2024.

The Foundation continued to work to further embed the findings of its flagship **Legal Framework for Impact (LFI)** project. The groundbreaking LFI legal report written by Freshfields and commissioned by the Foundation alongside PRI and UNEP FI showed that, across 11 key jurisdictions, the pursuit of impact cannot remain a specialist practice. Investors should feel empowered to set impact goals and take action to achieve them through their asset allocation, stewardship and policy advocacy. Activity during 2024 included convening senior investment professionals as well as other NGOs and funders to identify the barriers and opportunities for action.

The Foundation formed a new partnership with the World Business Council for Sustainable Development (WBCSD) in 2024 to support the creation of an avoided emissions standard so that companies' positive contributions to climate mitigation can be captured in a consistent and comparable way.

Climate TRACE

Climate TRACE is a non-profit coalition of artificial intelligence (AI)

based tech companies, non-government organisations and universities that are harnessing satellite imagery and other forms of remote sensing, artificial intelligence and collective data science expertise to track human-caused greenhouse gas (GHG) emissions with unprecedented detail and speed. Climate TRACE's emissions inventory is the world's first comprehensive accounting of GHG emissions based primarily on direct, independent observation. The Partners of Generation have provided significant funding for Climate TRACE.

At COP29 Climate TRACE released its latest inventory which, for the first time, provides monthly emissions data for every country and every major individual source of emissions in the world. Climate TRACE's global inventory now includes more than 660 million assets.

Participation in industry initiatives

Generation is a member of the Asia Investor Group on Climate Change (AIGCC), CDP, Ceres, the Institutional Investors Group on Climate Change (IIGCC), the IFRS Sustainability Alliance, the Investor Forum, the Powering Past Coal Alliance (PPCA), the Principles for Responsible Investment (PRI), the Taskforce on Nature-related Financial Disclosures (TNFD) Forum and The Climate Pledge, all of which work on reducing systemic ESG risks.

We are Founding Partners of the **Taskforce on Inequality and Social-related Financial Disclosures (TISFD)**, which launched in September 2024. TISFD is a global initiative to develop recommendations and guidance for businesses and financial institutions to understand and report on impacts, dependencies, risks and opportunities related to people. Generation's Senior Partner, David Blood, sits on the Steering Committee. The Generation Foundation is one of the funders of TISFD and sits on the Stewardship Council.

Generation helped to establish the Net Zero Asset Managers initiative (NZAM) and Generation's Head of Engagement, Edward Mason, sits on the NZAM Advisory Group.

Generation's Senior Partner, David Blood, sits on the Glasgow Financial Alliance for Net Zero (GFANZ) Principals Group and Edward Mason on the Steering Group. In 2024, Generation co-chaired work at GFANZ to develop **voluntary guidance** on incorporating nature into net-zero transition plans. Just Climate contributed a case study to the GFANZ publication **Case studies on transition finance and decarbonization contribution methodologies** (the case study starts at page 146).

Generation sits on the Investor Strategic Working Group of the Finance Sector Deforestation Action (FSDA) initiative and the Alternative Investment Management Association (AIMA) Global Responsible Investment Committee. We were interviewed for the **AIMA ESG handbook 2024** (the interview is at page 20).

Generation submitted a response to the IIGCC consultation on the draft Net Zero Investment Framework (NZIF) 2.0, advocating greater incorporation of nature-related climate factors.

Just Climate and the promotion of well-functioning markets

In 2024 Just Climate supported the following initiatives that seek to promote a well-functioning financial system:

- **International Sustainability Standards Board (ISSB) Investor Advisory Group (IIAG):** Just Climate is a member of the IIAG, a group of asset owners and asset managers in various markets that helps to ensure that the investor perspective is articulated clearly and considered in the ISSB's standard-setting process.
- **Prime Coalition's Project Frame:** Just Climate continued to participate in the content working group, which is working to build consensus around the terminology, methodologies and best practices for investors dedicated to assessing and reporting forward-looking GHG emissions impact.
- **UK Transition Plan Taskforce:** Just Climate was a member of the UK Government's Transition Plan Taskforce (TPT) Delivery Group, which concluded its work in 2024, passing responsibility for the TPT's disclosure documents to the IFRS Foundation.

- **World Business Council for Sustainable Development Avoided Emissions Independent Advisory Group:** Just Climate is a member of the group helping to refine WBCSD’s initial Guidance on Avoided Emissions published in 2023. The goal is to move towards a document with high technical quality that supports the further standardisation of avoided emissions methodologies and prepares for (partial) integration in standard-setting processes in the context of corporate climate action and market-based mechanisms.

In the spotlight: Public policy

Generation’s interaction on public policy relating to ESG is generally via industry associations referenced above; Generation sits on the IIGCC Policy Advisory Group and participated throughout 2024 in the GFANZ policy workstream. However, where we believe there is potential to materially advance sustainable investing, we contribute to the development of industry association positions, respond to consultations, support group statements and meet with policymakers.

In 2024 we:

Participated, in May 2024, in a breakfast meeting in the UK Parliament with three Labour MPs on policy to support the transition to net zero, hosted by IIGCC & Bankers for Net Zero;

Joined the **Business Coalition For a Global Plastics Treaty** in advance of the UN Summit ‘INC-5’ in Busan, South Korea, and amplified the Coalition’s call for a strong majority treaty rather than a weak consensus one during the negotiations that took place in November 2024;

Signed the following group statements or letters:

- **A business and investor letter calling on the EU to set a GHG emissions reduction target of at least 90% by 2040**, organised by the IIGCC and Corporate Leaders Group Europe
- **A Call to Action** for the global adoption of the ISSB corporate sustainability disclosure regime by 2025, organised by the London Stock Exchange Group, PRI, Sustainable Stock Exchanges Initiative and WBCSD
- **The 2024 Global Investor Statement to Governments on the Climate Crisis**, co-ordinated by the Founding Partners of the Investor Agenda – AIGCC, CDP, Ceres, the Investor Group on Climate Change, IIGCC, PRI and UNEP FI
- **An Amicus brief in support of the SEC climate disclosure rule** in the court case brought by its opponents including the US Chamber of Commerce and 21 state attorneys general
- **A statement from the private financial sector to the member states negotiating the international legally binding instrument to end plastic pollution**, drafted by UNEP FI, PRI, Finance for Biodiversity Foundation, Business Coalition for a Global Plastics Treaty, Dutch Association of Investors for Sustainable Development (VBDO) and CDP; and

Fed views to:

- GFANZ for its paper on investable Nationally Determined Contributions (national climate action plans submitted by countries under the Paris Agreement)
- IIGCC for its response to the European Commission call for evidence to inform its implementation guidance for the EU’s Renewable Energy Directive, covering permitting for renewable energy and grid infrastructure, grid connection queues and auction design
- PRI on a Chinese stock exchanges’ sustainability disclosure consultation, in particular on the need for stronger alignment with ISSB, stronger requirements for disclosure of emissions reduction targets and transition plans, and stronger requirements for disclosure of the management of supply chain nature-related risks.

Outcome

The Sustainability Trends Report continued to increase its reach, doubling the number of visitors to the STR site compared to the prior year. The Generation Foundation-funded Legal Framework for Impact Report remained critical reference advice on investors' legal duties, as sustainable investing remained under intense political attack in the United States.

Climate TRACE continued to see decision-makers start to leverage the database to drive decarbonisation. In July 2024 Altana, a value chain management system and Generation Growth Equity portfolio company, announced a strategic collaboration with Climate TRACE to allow its clients to more efficiently and accurately calculate Scope 3 carbon emissions in their value chains by drawing on site-specific emissions within these chains. By contrast, most Scope 3 emissions measurements are assembled using rough estimations – broad averages that skew the accuracy of results on the individual value chain level.

Notwithstanding the anti-ESG campaign in the US, NZAM's membership continued to grow in 2024, reaching more than 325 signatories with USD 57.5 trillion in assets under management (AUM). In this [blog](#) from November 2024, Rebecca Mikula-Wright, CEO of AIGCC and IGCC, and NZAM Chair, reflected on the progress of the initiative. This [post](#) from July 2024 sets out signatories' latest target disclosures.

All in all, however, as our Senior Partner David Blood wrote in his [Senior Partner Letter](#) covering 2024, in the last year, sadly, we have made little progress toward realising Generation's vision.

Generation and Just Climate will continue to work for transformational change across all aspects of our economies. As the Senior Partner Letter concludes: "We in the finance community must show leadership and create the circumstances in which sustainability goals can be advanced. There is a clear need for high-ambition investors to stand firm in their commitment to a sustainable economy and society."

Principle 5: Review and assurance

Signatories review their policies, assure their processes and assess the effectiveness of their activities.

Activity

No material updates. Please see [last year's report](#).

Outcome

No material updates. Please see [last year's report](#).

Investment approach

Principle 6: Client and beneficiary needs

Signatories take account of client and beneficiary needs and communicate the activities and outcomes of their stewardship and investment to them.

Context No material changes. Please see [last year's report](#).

Activity No material updates. Please see [last year's report](#).

Outcome No material updates. Please see [last year's report](#).

Principle 7: Stewardship, investment and ESG integration

Signatories systematically integrate stewardship and investment, including material environmental, social and governance issues, and climate change, to fulfil their responsibilities.

Context

No material changes. Please see [last year's report](#).

Activity

Roadmaps and research

Sourcing of investments at Generation and Just Climate is informed primarily by our research roadmaps that identify macro and sector trends, including material sustainability risks and opportunities.

Roadmaps in 2024 included:

- **Global Equity:** AI in edge computing, biofuels, consumer health, electronic design automation in semiconductors and semiconductor intellectual property, the EV transition, packaged food, semiconductor capital equipment and nuclear energy.
- **Growth Equity:** AI for diagnostics, B2B women's health, batteries, care orchestration, commercial food waste, cybersecurity, drug affordability, energy data, housing affordability, LatAm fintech, mobility, procurement, renewable energy procurement, software for personal care services, supply chain software and tools for renewables developers.

Just Climate:

- **Industrial Climate Solutions:** Biomass, biocarbon, direct lithium extraction refresh, decarbonising data centres refresh, road transportation refresh, waste, critical minerals refresh, grid and transmission, cement roadmap refresh, battery anodes, decarbonising plastics, industrial heat refresh, long duration energy storage refresh.
- **Natural Climate Solutions:** alternative proteins, bio-based fertilisers, bio-control, biologicals in Brazil, enhanced rock-weathering, soil carbon and soil health, biodiversity MRV (measurement, reporting and verification), regenerative agriculture enablers, biomethane, sustainable textiles, agroforestry, ecosystem restoration in Brazil.

Business Quality and Management Quality

Assessment of a company's Business Quality (BQ) and Management Quality (MQ) is at the heart of the Generation and Just Climate investment process.

Assessing BQ explicitly includes deep analysis of a company's positioning with regards to the material and relevant sustainability factors within its sector. Analysts consider both *what* the company does in terms of products and services and *how* they conduct their business operations.

Assessing MQ explicitly includes examination of the strengths and weaknesses of company culture, consideration of whether the management and Board are fit for purpose and determining whether executive compensation is aligned to long-term success.

In line with their mandates, Generation's private markets investment teams build on BQ and MQ assessment by analysing whether the company's products or services accelerate a sector to a more sustainable end-state, what social or environmental goal(s) the company's products or services contribute to, how Generation can add value to the prospective investment, and impact KPIs to track. We call this our System Positive (SP) assessment.

In addition to assessments of BQ and MQ, Just Climate performs a Climate Impact Quality (CIQ) assessment. This assessment considers a company's scale and timeliness of GHG emissions avoidance and/or removal relative to an ambitious abatement target, whether the company's business model is scalable/replicable such that it could address a significant percentage of global emissions, whether it is a sustainable solution, and how Just Climate can be a catalytic investor.

Analysts continue to review all these issues while a company is in our clients' investment portfolios. Where analysts change their assessment and believe a company has been mis-rated, they will revert to the investment team.

Stewardship

Where we believe improved management of financial or ESG issues is required, this is incorporated into our stewardship activities across all strategies, asset classes and geographies.

Our stewardship is focused on what we believe will promote the interests of the company, its stakeholders and shareholders over the medium and long term. On climate change, we assess companies' strategies for attaining net-zero emissions on a multi-decade basis. We never encourage companies to optimise performance for the short term.

Generation's Research and Engagement teams maintain active relations with all key service providers to ensure that our research needs are fulfilled.

Generation is not dependent on service providers for any stewardship activities. We carry out our own engagement and, for publicly listed companies, votes at shareholder meetings are analysed on a bespoke basis by analysts.

Outcome

The Home Depot, the US home improvement retailer, is an example of ESG information and information gathered through stewardship having an impact on whether to add a company to the Global Equity Focus List and potentially acquire shares. The analyst's research into the company unearthed shareholder and NGO concerns about the sustainability of The Home Depot's wood sourcing from Canada and the Congo basin. After desk-based research and discussions with the company, existing shareholders and a timber sustainability certifier, the analyst decided not to proceed further with his consideration of the company at that time.

Adidas, the sportswear company, is an example of ESG information and information gathered through stewardship having an impact on Global Equity disposal decisions. In the first half of 2022 we built a position in the company representing 3% of the fund. At the time, Adidas had a partnership with Ye (formerly known as Kanye West) with the Yeezy brand, dating to 2013, which was commercially successful. In October 2022, Adidas terminated the relationship following antisemitic comments by West on social media platforms. In the course of 2023, further revelations surfaced regarding Adidas' management of its relationship with Ye, with allegations that, over the course of the partnership, Ye's behaviour was seriously inappropriate or worse on many occasions. This included, allegedly, racist, antisemitic and sexist comments and actions. It was evident that the management team was aware of many of these allegations and had not taken appropriate steps. This was a serious negative discovery on Management Quality. We significantly reduced our position over 2023 as we sought to manage the position down while realising upside reward potential for clients. The position was fully redeemed in 2024 and we dropped Adidas from our coverage.

Volue, a provider of advanced software and digital solutions across the entire energy value chain, is an example of an investment made by the Growth Equity strategy in 2024 that integrated roadmap research. Volue was identified in energy data roadmap work as an exciting opportunity, used by nine of the ten largest European power producers to manage, forecast and optimise their energy assets, delivering up to double-digit percentage increases on power produced. Generation was part of a consortium of investors that took the company private in October 2024 to assist the Company in its next phase of growth, with the aim to achieve a more adaptable and digitised energy infrastructure.

Continuum Green Energy, one of the leading renewable energy groups in India focused on commercial and industrial consumers, is an example from 2024 of how investments made by Just Climate incorporate deep ESG research and stewardship. The investment in Continuum was Just Climate's first emerging market deal. Just Climate had been following Continuum since early 2023. Due diligence on the potential deal included identifying key stakeholder groups and working with a local third-party expert for site visits across the portfolio and in-person consultation with local stakeholders. Among others, biodiversity and health and safety are particularly significant outcomes for this industry and were therefore closely examined during diligence. In August 2024 Just Climate was able to enter into an agreement to invest INR 12.56 billion (approximately USD 150 million) in new equity to support Continuum's continued deployment of renewable generation and storage projects across India. As part of due diligence, Just Climate agreed on an environmental and social action plan with the company and have been working with management to implement it since the point of investment.

Principle 8: Monitoring service providers

Signatories monitor and hold to account managers and /or service providers.

Activity

Generation and Just Climate keep all their investment research providers under review, based on feedback from investment analysts of the utility of broker research, expert networks and individual experts. Active dialogue is maintained with all our principal service providers relevant to stewardship, such as ESG research providers and proxy advisers.

Specific activities of note in 2024 included:

- We continued to review providers of nature-related data for investors and held discussions with ESG consultancies on the potential to work together to enhance the Generation and Just Climate annual climate and nature report.
- We commenced exploration with our proxy advisor of the potential for a custom proxy voting policy to improve our proxy voting process. This involved examination of how much our Proxy Voting Principles, and our engagement escalation processes, could be translated into a custom policy.
- In public equities, we held discussions with one of our ESG data providers, MSCI, about the time taken to update companies' GHG emissions data and the provider's failure to distinguish between location-based and market-based Scope 2 emissions data. We also trialled a new ESG data solution built as a user partnership.
- Generation and Just Climate together explored the potential to work with consultancy Shift on our implementation of the UN Guiding Principles on Business and Human Rights.
- We reviewed new service providers for climate scenario analysis for the Generation and Just Climate annual climate and nature report. We have long been dissatisfied with the inadequacy of our existing listed equity climate scenario analysis service provider, and indeed the market standard for this service. One of the providers we reviewed was Trex, a new provider spun out of the University of Exeter that is developing non-linear energy transition and physical risk modelling for investors.
- Just Climate reviewed data providers for GHG emissions factors.

Outcomes

Generation and Just Climate's roster of third-party investment research providers is constantly adjusted according to analyst feedback and in the light of new provider trials. In relation to stewardship-focused service providers, specific outcomes of note in relation to 2024 activity included:

- We entered into an agreement with an ESG consultancy to support the Generation and Just Climate 2025 climate and nature report, including through AI analysis and deeper assessment of nature-related dependencies, impacts, risks and opportunities.
- Just Climate signed a licence for the Integrated Biodiversity Assessment Tool (IBAT), which provides data on key biodiversity areas, protected areas and the presence of species on the International Union for Conservation of Nature (IUCN) Red List of Threatened Species, as well as preliminary ratings for restoration and threat mitigation activities.
- Just Climate signed a licence for Orbify, which offers a suite of satellite data-powered tools for monitoring nature, including forest integrity and habitat types and how this has changed over time.
- We concluded that a custom proxy voting policy with our proxy advisor, incorporating Generation input on engagement escalation, would deliver improved process automation and consistency, while leaving responsibility to assess votes on a case-by-case basis with analysts. We therefore put new contractual arrangements in place for a custom proxy voting policy for 2025.
- MSCI promised improvements in their provision of climate data. We did not find the output of the new ESG data solution built as a user partnership to be of sufficient quality.
- Generation and Just Climate concluded an agreement to work with Shift in 2025 to evaluate current investment and stewardship processes on human rights, set foundational knowledge across the firm and explore emerging market jurisdiction-specific considerations at Just Climate.
- We concluded that the Trex service should give us and our clients more accurate insight into transition risks and opportunities, tipping points and extreme weather tail risks. We therefore joined a development consortium to help shape, and benefit from, Trex's innovative approach.
- Just Climate signed a licence for Ecoinvent, an environmental data provider, whose GHG emissions factors data Just Climate uses to support assessments of GHG emissions abatement and measurement of portfolio company GHG emissions.

Engagement

Principle 9: Engagement

Signatories engage with issuers to maintain or enhance the value of assets.

Activity

Generation's [Stewardship and Engagement policy](#) describes how we think about and approach engagement.

Engagement in public markets

Analysts interact multiple times a year with *all* the holdings for which they are responsible.

Company-specific engagement is conducted when our research and monitoring identify topics that could, in our view, create material risks for a company or, in contrast, offer significant opportunities to enhance its performance.

When we wish to communicate our views to all Focus List or portfolio companies, or a significant subset, we will undertake an engagement programme. In all our engagement programmes, we are guided by our belief that acting on the sustainability crisis is our fiduciary duty.

We are also responsive to companies who reach out to us for governance engagement in relation to executive compensation policy or their AGMs.

Given the concentrated nature of our portfolios, it is not our practice to exclude companies from engagement programmes on account of the size of our holding. However, the size of our holding, whether we expect to continue to maintain our investment position and the materiality of the issue at hand for the company are all taken into account when we determine the companies that are the highest priorities for proactive follow-up and progress.

In 2024, in the **Global Equity** strategy, we undertook **423** meetings with Focus List companies. The purpose of our meetings can be 'monitoring,' to ensure that our investment thesis remains intact, or 'engagement,' where we talk with the company about our views. In 2024, **85** of our meetings included engagement. We engaged on environmental issues in **60** meetings, social issues in **24** meetings, governance issues in **31** meetings and business issues in **12** meetings (i.e., in some meetings, a combination of issues was discussed).

In the **Asia Equity** strategy, we undertook **105** meetings with Focus List companies. **Twelve** of our meetings included engagement. We engaged on environmental issues in **ten** meetings, social issues in **two** meetings, governance issues in **three** meetings and business issues in **two** meetings (i.e., in some meetings, a combination of issues was discussed).

Three engagement programmes were pursued in public markets in 2024: climate change, deforestation and equity, diversity and inclusion (EDI).

GLOBAL EQUITY STRATEGY: ENGAGEMENT	
● Monitoring	338
● Engagement	85
● Environmental issues	60
● Social issues	24
● Governance issues	31
● Business issues	12
ASIA EQUITY STRATEGY: ENGAGEMENT	
● Monitoring	93
● Engagement	12
● Environmental issues	10
● Social issues	2
● Governance issues	3
● Business issues	2

In the spotlight: company-specific engagement at Anta Sports

Anta Sports is China’s largest sports brand. The company has been a holding in the Global Equity strategy for three years and the Asia Equity strategy for nearly seven. We have built a close relationship in which the company sees us as a trusted sustainability partner. While our regular dialogue has been with sustainability and investor relations leads, we have also enjoyed access to Ding Shizhong, the Chairman and co-founder of the company.

We have focused our engagement relationship on supply-chain management. The company itself wants to see Anta move closer to the standards of international brands in this area and we were able to provide suggestions for specific improvements that would help Anta achieve this.

Climate change

The science is clear: our climate is in crisis due to man-made greenhouse gas (GHG) emissions. According to the Intergovernmental Panel on Climate Change (IPCC), the global average temperature for the decade 2011–2020 was 1.1°C above pre-industrial levels. 2024 was the warmest year on record: according to the World Meteorological Association, the global average surface temperature for 2024 was more than 1.5°C above pre-industrial levels.

We see the results in a constant stream in the news: heatwaves, storms, floods, droughts, forest fires, melting ice, rising sea levels, ocean warming and ocean acidification. If we do not heed climate science and cut GHG emissions in line with the Paris Agreement, we will cause irreversible damage to the earth’s ecosystems, its ability to sustain human life and our economy.

Generation operates a clear public markets climate change engagement framework. In the below diagram, you can see that we identify four levels of performance. Level 1 companies disclose GHG emissions either to CDP or in their own reporting. At Level 2 they disclose on climate-related risk and opportunity, in line with the recommendations of the TCFD/ISSB. Level 3 means they participate in the Science Based Targets initiative (SBTi). Companies at Level 4 are aligned with our goal of net-zero emissions no later than 2040 and are, in our opinion, showing leadership on climate action. We publish and share a booklet, **Making Sense of Climate Change**, as a resource for companies.

In 2021, we started generally to vote against the re-election of the Chairs of Global Equity portfolio companies that do not disclose their emissions either in company reporting or via CDP.

Having borne down on non-disclosure of emissions, in 2023, we started generally to vote against the re-election of the Chairs of Global Equity portfolio companies that had not formally committed to set science-based targets (SBTs) with the Science Based Targets initiative (SBTi). This is in line with our view that emissions-reduction targets aligned with the Paris Agreement and climate science must be the norm for every business. Across Generation's assets under management, we are seeking to achieve 60% SBT coverage by 2025, and 100% coverage by 2030.

This is in line with our view that emissions-reduction targets aligned with the Paris Agreement and climate science must be the norm for every business. Across Generation's assets under management, we are seeking to achieve 60% SBT coverage by 2025, and 100% coverage by 2030.

A significant focus of Global Equity climate engagement in 2024 remained portfolio companies that have not formally committed to setting SBTs with SBTi. However, we were also increasingly focused on understanding whether companies are successfully executing against their targets and transition plans. Finally, we are seeing a small number of companies being removed from SBTi because they have not been able to follow up their commitment to the initiative with securing target validation from SBTi. In all, climate change featured in **50** Global Equity engagement meetings in 2024. The corporate response to the climate crisis is by far the issue on which we engage most in the Global Equity strategy.

Our climate engagement efforts in the Asia Equity strategy have been more focused, as we targeted first the companies that we think can lead the way: iconic Asian firms that compare themselves not only to local peers but also global ones, and that we believe can drive ambition and set the tone in their markets. We have particularly prioritised Alibaba, Anta Sports, HDFC Bank, Taiwan Semiconductor Manufacturing Company (TSMC) and Tencent. Climate change was discussed in **eight** Asia Equity engagement meetings in 2024. Additional companies for engagement have been identified for 2025 as we deploy more widely the same engagement framework for climate change that we have used in the Global Equity strategy.

Generation framework for company action on climate change

In the spotlight: deforestation engagement

We cannot achieve the goals of the Paris Agreement or the Convention on Biological Diversity without urgently halting deforestation. Deforestation is a systemic sustainability risk for investors.

Generation is therefore an active member of the Finance Sector Deforestation Action (FSDA) initiative and sits on the Investor Strategic Working Group. FSDA was established at COP26 in Glasgow in 2021 and brings together more than 30 financial institutions that have committed to use best efforts to end commodity-driven deforestation in their investment and lending portfolios.

We are active participants in the FSDA collective engagement programme, which covers 80 companies. Seven of these companies are in the Global or Asia Equity portfolios or on their Focus Lists. These companies represent our core exposure to deforestation risk and are our priority names for engagement. We are leading FSDA engagement with five of them and are a supporting investor for the other two.

In addition to these priority names, we identified further companies that have been assessed by Forest 500, an initiative of the non-governmental organisation Global Canopy, or where we ourselves believe that there is material use of one or more forest-risk commodities or risk of financing of deforestation. These are our second-tier engagement priorities, of which there are eight at the time of writing.

As with climate change, our engagement is shaped by a clear framework, illustrated to the right. These are explained in a guide for companies entitled '[Making Sense of Deforestation.](#)'

In the course of the year, we had **14** meetings with Global Equity Focus List companies on deforestation and **five** with Asia Equity Focus List companies.

FSDA signatories as a whole have committed to publicly report credible progress through the initiative by 2025.

Equity, diversity and inclusion (EDI)

Generation's final public markets engagement programme operating to a structured framework is on equity, diversity and inclusion (EDI). Our framework is rooted in the business case for diversity and eschews a one-size-fits-all approach. Instead, we are of the view that companies, as set out in this [guide](#), should disclose comprehensive EDI data and ambitious plans for improvement.

We believe that companies will get the most benefit from human capital if they work in the direction of:

- Gender parity on the Board, executive committee and throughout the organisation;
- Racial and ethnic representation on the Board, executive committee and throughout the organisation that reflects the societies from which the company recruits and the customers that the company serves; and
- No structural differences in the roles performed by women and minority candidates.

EDI featured in **16** Global Equity engagement meetings in 2024.

Nature

Generation recognises nature loss as a systemic risk, and has embraced the recommendations of the Taskforce on Nature-related Financial Disclosures (TNFD) on the assessment of nature-related dependencies, impacts, risks and opportunities.

In 2024 we identified a number of priority companies in the Global Equity portfolio exposed to particular nature-related issues. We discussed water and pollution/waste in **three** engagement meetings each and biodiversity in **two**.

Governance and business issues

Our public markets engagement on governance and business issues is varied and company-specific. In 2024, executive compensation was the most commonly discussed governance issue in the Global Equity strategy, in **12** meetings, but Board composition and capital allocation were also significant topics for engagement, each covered in **ten**. In the Asia Equity strategy, the meetings that included governance and business discussions covered Board composition, auditor rotation and capital allocation.

Engagement in private markets

In Generation's private markets teams, our engagement focuses on value creation. Although objectives of a given engagement may vary, the overarching objective of our engagements is to enhance long-term business and investment value, by reducing risk and driving financial performance and impact on sustainability objectives in lockstep.

The **Growth Equity** framework for engagement focuses on five value-add levers:

- Board composition
- commercial expansion
- product strategy
- people & organisation
- capital markets

Impact measurement and management is integrated as a value-driver across all these areas.

A summary of validated engagements in 2024 is shown in the table below, by area of focus.¹

Fund	Engagement interactions in:				
	Board	Commercial	Product	People & Org.	Capital Markets
Climate Solutions Fund I	0	0	0	0	0
Climate Solutions Fund II	0	3	7	4	0
Sustainable Solutions Fund III	1	10	5	19	0
Sustainable Solutions Fund IV	0	16	10	18	1
Total	1	29	22	41	1

The **Private Equity** team deploys a highly active ownership model across a focused portfolio, allowing a substantial portion of the investment team's time to be dedicated to working in close partnership with its portfolio companies toward mutual goals.

¹ One company may benefit from multiple engagements, even within the same area of focus. Likewise, one commercial Roundtable event may be logged as multiple engagements, if that event was designed to address the commercial trajectory of multiple companies.

The Private Equity framework for engagement builds on and differentiates from the stewardship models of traditional private equity firms:

Private equity value creation toolkit	Longer-term strategic initiatives	Unlocking value through sustainability
<p>Including:</p> <ul style="list-style-type: none"> strengthening leadership team and finance function improving governance, reporting and controls optimising organisational design and talent strategy with the company 	<p>Including:</p> <ul style="list-style-type: none"> supporting engagement with existing and prospective major clients identifying and supporting projects for longer-term value creation helping to deliver acquisition opportunities 	<p>Including:</p> <ul style="list-style-type: none"> scaling or launching new products to drive returns and impact in lockstep building company sustainability capabilities and team integrating financial, impact and ESG reporting

A summary of validated engagements is set out below.

Fund	Engagement interactions: product	Engagement interactions: commercial	Engagement interactions: organisation	Engagement interactions: Board
Long-term Equity Fund I	1	2	3	0

Outcome

Public markets – company-specific engagement

In the course of our multi-year engagement on supply-chain management, **Anta Sports** has improved its practice in a number of ways. In particular, it has published a new supply chain handbook that sets clear expectations of companies in its value chain on labour issues, worked with a consultant to conduct ESG risk assessments for both self-operated factories and suppliers, and disclosed a list of its strategic suppliers on its website.

Anta's toughest outstanding supply-chain challenge, however, remains assurance of labour standards in the Chinese cotton supply chain following the withdrawal of the Better Cotton Initiative from the country in 2020. As yet, Anta has not been able to put in place alternative certification arrangements and we remain in dialogue about whether and how progress might be made.

Public markets – climate change engagement

We saw further progress by Global Equity Focus List companies against our climate change framework. You can see below how, since the initiation of the framework, non-disclosure of emissions has almost vanished and companies have migrated up our climate levels with most companies now at Level 3 or Level 4.

Portfolio companies joining SBTi in 2024 included **Danaher**, **Steris** and **Texas Instruments**, the latter two after longstanding engagement. Portfolio companies having SBTs validated by SBTi in the course of the year included **Becton Dickinson**, **Gartner** and **Sika**. **Mercado Libre** was removed from SBTi in 2024. Portfolio coverage by validated SBTs in December 2024 stood at 60% (2023: 53%).

We discussed progress against decarbonisation goals with all three of our Global Equity big tech holdings, **Alphabet**, **Amazon** and **Microsoft**. We are closely tracking plans to address AI-related emissions at all three companies.

We continue to assess progress on emissions reduction at Amazon, as well as the company's plans for credible, external target validation following their removal from SBTi in 2023. We were pleased to see Microsoft join the Semiconductor Climate Consortium Energy Collaborative in 2024. The Energy Collaborative seeks to accelerate the deployment of renewable energy in Asian markets that are critical to semiconductor manufacturing.

At real estate company **CBRE**, we were pleased to see the publication of a holistic Climate Transition Strategy in December 2024. CBRE is the world's largest property manager, with more than seven billion square feet of managed property globally.

Participation in SBTi also increased in the Asia Equity strategy. **Samsonite** joined SBTi in 2024. Portfolio companies having SBTs validated by SBTi in the course of the year included **Anta Sports**, **Bank Rakyat Indonesia** and **Shimadzu**. **Godrej Consumer Products** was removed from SBTi in 2024. Portfolio coverage by validated SBTs in December 2024 stood at 33% (2023: 19%).

Public markets – deforestation engagement

We saw developments at three of the seven companies that we prioritise for engagement on deforestation, as follows:

- **Amazon** significantly improved the disclosures on deforestation within their sustainability report. Some European elements of Amazon's soy supply chain now meet the FSDA investor expectations.
- **Nestle** (not owned during 2024) has an advanced and sophisticated approach to deforestation. In 2024, deforestation-free volumes declined from 99.1% to 93.5%. However, this was due to the inclusion of coffee and cocoa within the group of commodities tracked, rather than a significant decline in deforestation-free volumes within the supply chain of an existing commodity.
- **Unilever** (not owned during 2024) is also one of the most advanced companies in terms of deforestation prevention and management. It rolled back several sustainability targets in 2024. This included a revision of their sustainable sourcing commitment from 100% to 95%. Whilst it was disappointing to see this, their rationale for doing it was that Unilever needs to have space to bring on new suppliers with whom they can work to improve their approach to deforestation. We will continue to monitor this closely, but were pleased to see that 97.5% of Unilever's palm oil, paper and board, tea, soy and cocoa order volumes were independently verified as deforestation-free.

Public markets – EDI engagement

We had excellent dialogue on EDI in 2024 with semiconductor manufacturer, **Analog Devices, Inc. (ADI)**. ADI has a sophisticated approach to diversity and inclusion, grounded in its need to attract and retain talent, and overseen by its board of directors. We had a positive conversation about the future direction of strategy. Given the political pressure in the US for companies to retreat from EDI commitments and activities, we will look to understand where US companies stand on this issue in 2025.

In the spotlight: Growth Equity engagement outcomes 2024

In 2024 the Growth Equity team worked with 15 companies – including **AlayaCare**, **Innovaccer**, **M-KOPA**, **Nature's Fynd**, **P44**, **Redis**, **Spring Health**, **Volue** and **WEKA** – to improve impact measurement. This was done by defining impact measures appropriate for each business and/or supporting the calculation of impact measures during the year. We also helped six companies – **Altana**, **Benevity**, **o9**, **M-KOPA**, **OneTrust** and **Volue** – explore a new impactful product strategy or better monetise their impact by integrating evidence of impact into a customer journey and expanded value proposition.

The team organised commercial roundtables or showcases to support the growth of 16 portfolio companies, including **Altana**, **Back Market**, **Benevity**, **Gusto**, **Nature's Fynd**, **Redis**, **Service Titan** and **Volue**, and with the aim of improving financial prospects and the real-world social and environmental contribution each company makes.

Finally, the Growth Equity team supported the appointment of a new independent Board member at **Vestiaire Collective** to improve the overall quality of governance.

Private equity

Over 2024, the Private Equity team was closely engaged with each of its two sustainability platform businesses, **FNZ** and **Octopus Energy**.

Highlights included:

- Continued work with Octopus Energy on product impact measurement, building on work with the company in 2023, by helping the company build the capability to manage and update its own carbon-avoided model in-house;
- Further supporting FNZ to scale product impact, including via product development strategy and strategic business advice;
- Continuing company ESG performance benchmarking for FNZ and Octopus Energy against other companies owned in Generation funds to help identify areas of outperformance and areas to improve; and
- Supporting FNZ with organisational development and governance upgrades, including transitions of the senior leadership team, alongside continued engagement on overall operational sustainability goals.

Since investment, the Private Equity team have worked closely with the Head of Sustainability at FNZ to develop and promote the 'FNZ Impact' product (now marketed under the umbrella of FNZ's Sustainable Finance suite). FNZ Impact allows individual savers and financial advisers to understand the impact of their portfolios, with the goal of driving a shift toward more sustainable capital allocation. In 2024 we continued intensive engagement with monthly, or even bi-weekly, collaboration on core design features, product roadmap and go-to-market strategy. In addition, the Private Equity team continued to sit on the FNZ and Octopus Energy Boards, and on the FNZ Sustainability, Diversity & Inclusion Committee, providing opportunities to support effective stewardship of both companies.

Principle 10: Collaboration

Signatories, where necessary, participate in collaborative engagement to influence issuers.

Activity

Generation mostly engages with companies on an individual basis, as we find personal, direct conversations are often most effective and contribute to building long-term relationships with management teams. However, where appropriate, and subject to careful legal analysis around ‘concert party,’ ‘group’ and related regulatory issues, we will participate in collaborative engagement.

We are members of the **Investor Forum** in the UK, which provides an effective forum for collaborative engagement when we share concerns with other Forum members about a UK-listed company. In 2024, the Investor Forum engagement conducted a very small number of engagements (three), and Generation did not own any of the companies concerned.

We participate in **Climate Action 100+**, the collaborative engagement initiative to ensure that the world’s largest corporate greenhouse gas emitters take appropriate action on climate change. Given our focus on sustainable investment, very few of our Focus List companies are covered by the initiative, and in 2024 we were a supporting investor in one engagement. We believe the initiative is an important collective effort to reduce corporate GHG emissions in line with the goals of the Paris Agreement and a useful vehicle for sharing best practice on climate change engagement.

We also participate in the **Net Zero Engagement Initiative** established by the Institutional Investors Group on Climate Change (IIGCC). This builds on and extends the reach of collaborative investor engagement on climate action beyond the Climate Action 100+ focus list. The central ask of companies engaged under the initiative is a robust corporate net-zero transition plan. Again, few of our Focus List companies are covered by the initiative. In 2024 we led engagement with one company and participated in one further engagement.

We participated in CDP’s final **Science Based Targets campaign**, which wrote to approximately 2100 global companies on behalf of financial institutions and multinational firms. The campaign asks companies to commit to and set science-based targets and is therefore very well aligned with our own climate stewardship strategy.

Outcome

In its 2024 progress update, **Climate Action 100+** reported that 80% of focus companies had made net-zero commitments (up from 77% in the 2023 progress update). For the first time, a majority of assessed companies – 67% – reduced their emissions intensity over the prior three years. At the same time, the initiative’s Net Zero Company Benchmark continued to show that much progress is still required for all focus companies to fully align their businesses with the goals of the Paris Agreement.

One meeting was held with the company on which Generation leads engagement as part of the **Net Zero Engagement Initiative**. While the company already has a comprehensive net-zero transition plan, which it successfully put to a shareholder vote in 2023, this meeting indicated that there are some aspects of the plan that can benefit from further development.

CDP’s 2023–24 **Science Based Targets campaign** saw 71 companies take action.

Principle 11: Escalation

Signatories, where necessary, escalate stewardship activities to influence issuers.

Activity

Generation escalates engagement when a company does not meet its standards and we believe continued investment and engagement is in the best interests of our clients.

If we determine it is in the best interests of our clients, we exercise votes against management at company general meetings, such as voting against management on remuneration or voting against the re-election of directors.

In 2024, in the Global Equity Fund, we chose not to support management on remuneration at **10X Genomics, Analog Devices, JLL, Charles Schwab** and **Twilio**.

At **Twilio** we also expressed our concerns about the failure of Board members to hold management to account adequately on acquisitions and capital allocation by withholding our support for the re-election of Jeff Epstein as a director. Mr Epstein was the only longstanding non-executive up for re-election due to the company operating staggered Board elections.

We continued to use proxy voting as an escalation device on climate change in Global Equity in line with our policy generally to vote against the Chairs of companies that had not yet committed to set science-based targets (SBTs) with SBTi. In total, we exercised votes against the Chair, or other responsible non-executive directors, at **nine** portfolio companies on climate grounds in the course of the year. These companies were: **10X Genomics, Amazon, Baxter, CooperCompanies, Charles Schwab, Dentsply Sirona, Nutanix, Steris** and **Texas Instruments**.

Case study: voting against management at Charles Schwab

At **Charles Schwab**, the financial services company, we voted against the re-election of all directors on the ballot at the 2024 Annual Meeting of Stockholders, as we had done in 2023. The company has a staggered Board, and five of the company's directors were put forward to a shareholder vote. We believe all directors should be subject to annual election and we have long-standing concerns about the size and quality of the Board.

We again voted against executive compensation, which we believe has been excessive given that risk management missteps led to poor financial outcomes for Schwab in 2023. We also chose not to support management by abstaining on a shareholder proposal recommending that the company improve the executive compensation programme to include the CEO pay ratio factor.

On EDI issues, we voted for a shareholder proposal requesting the company to report on median pay gaps across race and gender, as we support pay gap reporting.

Finally, we voted against the ratification of Deloitte as auditors as they have been in place since 1976, and we support auditor rotation.

On EDI, we abstained on the re-election of the Chair of the Nominating Committee at **Waters** on account of the lack of gender diversity on the Board. Seven director candidates on the proxy were male, and two female. However, the company recognised the desirability of improved diversity, noting in the proxy statement that the Board had an active search to identify a female director candidate who would bring additional and complementary skills to the Board. We determined that an abstain vote was the appropriate escalation in this instance.

In the Asia Equity Fund, we chose not to support management on remuneration at **Bank Rakyat** due to longstanding concerns about high remuneration.

We did not support the re-election of one or more directors at **Coupang** (the Board maintains a multi-class structure not subject to a reasonable time-based sunset provision), **HDFC Bank** (Board refreshment required), **Microchip** (long-tenured director), **Samsonite** (Board refreshment required) and **Texas Instruments** (company had not committed to SBTi).

Outcome

None of the companies at which we voted against executive compensation in 2024 lost their advisory votes on compensation. However, neither **10X Genomics** nor **Twilio** are now held in the portfolio and 10X Genomics has additionally been removed from the Global Equity Focus List.

As noted in our commentary under Principle 9, **Steris** and **Texas Instruments** did commit to set Science Based Targets subsequent to their shareholder meetings. Like 10X Genomics, both **Baxter** and **Dentsply Sirona** are no longer held in the portfolio and have in addition been removed from the Global Equity Focus List.

Waters were good to their word and improved Board gender diversity after their AGM by appointing a further female non-executive director.

No progress has yet been made on governance at **Charles Schwab** and this remains a focus of our stewardship activities.

In the Asia Equity Fund, **Bank Rakyat** won its compensation vote, and the directors at other companies whom we voted against above were re-elected. However, there was a 25% vote against the director we believe should be replaced at Samsonite.

Exercising rights and responsibilities

Principle 12: Exercising rights and responsibilities

Signatories actively exercise their rights and responsibilities.

Context

No material changes since [last year's report](#).

Our [Proxy Voting Principles](#) are disclosed on our website.²

Activity

The headlines from our voting activity during 2024 for our Global Equity strategy are as follows:

- There were 633 resolutions at portfolio companies on which we qualified to vote.³
- We voted 100% of these proxies.
- For management proposals, we chose not to support management (either voting against or abstaining) on 43 occasions (7% of voting on management proposals).
- 6% of proposals were filed by shareholders.
- We voted in favour of 35% of shareholder proposals.

2024 GLOBAL EQUITY PROXY VOTING SUMMARY

		For	Against / withhold	Abstain	Total	% against management
Management resolutions	Board election & structure	373	18	7	398	6%
	Compensation-related	72	5	0	77	6%
	Auditor-related	36	4	4	44	18%
	Routine business	59	2	0	61	3%
	Other business	10	3	0	13	23%
	Total		550	32	11	593
Shareholder resolutions ⁴	Governance	4	8	1	13	38%
	Environmental	1	1	0	2	50%
	Social	9	16	0	25	36%
	Total		14	25	1	40

² See the bottom of this page: <https://www.generationim.com/our-strategies/>

³ In a limited number of cases, due to registration requirements that lock up shares or other legal reasons, we are sometimes unable to vote. This is a consideration in security selection.

⁴ Votes for shareholder resolutions, and abstentions, are recorded as votes against management, unless the votes are in line with management recommendations.

For full disclosure of our voting in our Global Equity strategy, please see Annex 1.

Rationales are given for votes as follows:

- Votes against management;
- Votes against shareholder resolutions;
- Votes withheld;
- Votes against proxy advisor recommendations; and
- Votes on ballot items listed on the Investment Association public register of votes at UK companies that attracted greater than 20% opposition.

The headlines from our voting activity during 2024 for our Asia Equity strategy are as follows:

- There were 437 resolutions at portfolio companies on which we qualified to vote.⁵
- We voted 100% of these proxies.
- For management proposals, we chose not to support management (either voting against or abstaining) on 26 occasions (6% of voting on management proposals).
- 1% of proposals were filed by shareholders.
- We voted in favour of 75% of shareholder proposals.

2024 ASIA EQUITY PROXY VOTING SUMMARY						
		For	Against / withhold	Abstain	Total	% against management
Management resolutions	Board election & structure	177	13	0	190	7%
	Compensation-related	50	2	0	52	4%
	Auditor-related	30	1	0	31	3%
	Routine business	109	4	0	113	4%
	Other business	41	6	0	47	13%
	Total		407	26	0	433
Shareholder resolutions ⁶	Governance	1	1	0	2	50%
	Social	2	0	0	2	100%
	Total	3	1	0	4	75%

For full disclosure of our voting in our Asia Equity strategy, please see Annex 2.

Generation's Control team ensures that the share ownership for our clients (in both commingled funds and separate account mandates) is reflected accurately in the shares available to vote on our proxy voting platform.

Outcome

Disclosure of stewardship outcomes where we have escalated engagement to vote against management is given in our reporting under Principle 11 above.

⁵ In a limited number of cases, due to registration requirements that lock up shares or other legal reasons, we are sometimes unable to vote. This is a consideration in security selection.

⁶ Votes for shareholder resolutions, and abstentions, are recorded as votes against management, unless the votes are in line with management recommendations.

Analog Devices, Inc.	USA	Annual	13-Mar-24	Management	Board election & structure	Elect Director Ray Stata	1j	For	For	No	
Analog Devices, Inc.	USA	Annual	13-Mar-24	Management	Board election & structure	Elect Director Susie Wee	1k	For	For	No	
Analog Devices, Inc.	USA	Annual	13-Mar-24	Management	Compensation-related	Advisory Vote to Ratify Named Executive Officers' Compensation	2	For	Against	Yes	We agree that the CEO's compensation should be competitive given the value he has added over time. However, total compensation is considerably above the median of ADI's peers, both on a one and three year basis. Many of these peers are also meaningfully bigger in size in terms of revenues.
Analog Devices, Inc.	USA	Annual	13-Mar-24	Management	Auditor-related	Ratify Ernst & Young LLP as Auditors	3	For	Against	Yes	Same auditors since 1967. We believe it is good practice to rotate auditors periodically.
Analog Devices, Inc.	USA	Annual	13-Mar-24	Shareholder	Governance	Adopt Simple Majority Vote	4	Against	Against	No	We believe supermajority thresholds have their place, especially when a company has good governance practices in general, like an independent Board, annual election of directors, proxy access etc.
The Cooper Companies, Inc.	USA	Annual	19-Mar-24	Management	Board election & structure	Elect Director Colleen E. Jay	1.1	For	For	No	
The Cooper Companies, Inc.	USA	Annual	19-Mar-24	Management	Board election & structure	Elect Director William A. Kozy	1.2	For	For	No

Siemens Healthineers AG	Germany	Annual	18-Apr-24	Management	Board election & structure	Elect Ralf Thomas to the Supervisory Board	9.1	For	For	No	Proxy advisor objection mostly on technical grounds (length of tenure, lack of independence). Reality is this is a company that is majority owned by Siemens AG. Proxy advisor comments don't account for the calibre of the individual and it is hard to call some of the individuals non-independent. We think the slate of candidates for approval is appropriate and likely offers skillsets that are complementary to the executive management. Voting for these director candidates is in shareholders' best interests.
Siemens Healthineers AG	Germany	Annual	18-Apr-24	Management	Board election & structure	Elect Karl-Heinz Streibich to the Supervisory Board	9.2	For	For	No

Danaher Corporation	USA	Annual	07-May-24	Shareholder	Governance	Reduce Ownership Threshold for Shareholders to Call Special Meeting	4	Against	For	Yes	The current 25% threshold is too high. Our interests would be better served with a lower threshold, especially in light of the company size. A 10% threshold is a reasonable ask.
Danaher Corporation	USA	Annual	07-May-24	Shareholder	Social	Report on Effectiveness of Diversity, Equity, and Inclusion Efforts	5	Against	Against	No	On careful consideration of the shareholder proposal, company disclosure on DEI, the evolution of those disclosures over time and the ambitious targets set for

ANNEX 1 – GLOBAL EQUITY Company name	Country	Meeting type	Meeting date	Proponent	Proposal categorisation	Proposal text	Proposal number	Management recommendation	Vote instruction	Vote Against management	Rationale
											improving diversity, we do not think support for the proposal is warranted. Existing disclosures and planned additions sufficiently allow shareholders to assess the adequacy of the company's DEI initiatives. Not clear-cut, but on balance we feel this proposal adds more complexity and directs certain disclosures that are not necessarily required.

Amazon.com, Inc.	USA	Annual	22-May-24	Management	Auditor-related	Ratify Ernst & Young LLP as Auditors	2	For	For	No	
Amazon.com, Inc.	USA	Annual	22-May-24	Management	Compensation-related	Advisory Vote to Ratify Named Executive Officers' Compensation	3	For	For	No	We disagree with proxy advisor assessment. We support Amazon's approach to executive compensation as it is overwhelmingly orientated to significant long term share ownership which we believe supports long term alignment.
Amazon.com, Inc.	USA	Annual	22-May-24	Shareholder	Social	Establish a Public Policy Committee	4	Against	Against	No	We believe that such a committee is unnecessary and should be at the Board's discretion.
Amazon.com, Inc.	USA	Annual	22-May-24	Shareholder	Governance	Establish a Board Committee on Corporate Financial Sustainability	5	Against	Against	No	Political resolution alleging Amazon's positions on issues like anti-racism are divisive. We believe that such a committee is unnecessary and should be at the Board's discretion.

ANNEX 1 – GLOBAL EQUITY Company name	Country	Meeting type	Meeting date	Proponent	Proposal categorisation	Proposal text	Proposal number	Management recommendation	Vote instruction	Vote Against management	Rationale
Amazon.com, Inc.	USA	Annual	22-May-24	Shareholder	Social	Report on Customer Due Diligence	6	Against	Against	No	We believe that such a report is unrealistic given the nature of the customers using these products and the ask appears redundant considering the work the company has done on this topic.
Amazon.com, Inc.	USA	Annual	22-May-24	Shareholder	Social	Report on Lobbying Payments and Policy	7	Against	For	Yes	We would like to see greater transparency around lobbying payments and policy.
Amazon.com, Inc.	USA	Annual	22-May-24	Shareholder	Social	Report on Median and Adjusted Gender/Racial Pay Gaps	8	Against	Against	No	We do not believe that incremental further reporting of this nature would be additive to the disclosures the company gives of gender and racial pay gaps by role.
Amazon.com, Inc.	USA	Annual	22-May-24	Shareholder	Social	Report on Viewpoint Discrimination	9	Against	Against	No	Political resolution alleging restriction of political and religious viewpoints. We are content with the company's current reporting and policies.
Amazon.com, Inc.	USA	Annual	22-May-24	Shareholder	Social	Report on Impact of Climate Change Strategy Consistent With Just Transition Guidelines	10	Against	Against	No	While we are fully supportive of a Just Transition, we do not believe that this proposal would be additive to the company's existing reporting.
Amazon.com, Inc.	USA	Annual	22-May-24	Shareholder	Environmental	Report on Efforts to Reduce Plastic Use	11	Against	Against	No	We do not believe this proposal focuses on the greatest areas of waste (plastic or otherwise) or that its request would be additive to investors' understanding of Amazon's sustainability initiatives.
Amazon.com, Inc.	USA	Annual	22-May-24	Shareholder	Social	Commission Third Party Assessment on Company's Commitment to Freedom of Association and Collective Bargaining	12	Against	For	Yes	We continue to support such an assessment. While we recognise that US labour law does not require neutrality agreements, the company should ensure that its communication facilitates all workers fully understanding the benefits of choosing to join or not join a union.
Amazon.com, Inc.	USA	Annual	22-May-24	Shareholder	Environmental	Disclose All Material Scope 3 GHG Emissions	13	Against	For	Yes	We strongly agree that Amazon must disclose all material Scope 3 emissions
Amazon.com, Inc.	USA	Annual	22-May-24	Shareholder	Social	Commission Third Party Study and Report on Risks Associated with Use of Rekognition	14	Against	Against	No	We do not believe that such a study would be additive to the disclosures already made by the company.
Amazon.com, Inc.	USA	Annual	22-May-24	Shareholder	Governance	Adopt Policy to Require Board Members to Disclose their Political and Charitable Donations	15	Against	Against	No	Political resolution alleging Amazon adopts controversial stances such as 'lenient criminal justice policies'. We do not believe the policy proposed is necessary.
Amazon.com, Inc.	USA	Annual	22-May-24	Shareholder	Social	Establish a Board Committee on Artificial Intelligence	16	Against	Against	No	We believe that such a committee is unnecessary and should be at the Board's discretion.
Amazon.com, Inc.	USA	Annual	22-May-24	Shareholder	Social	Commission a Third Party Audit on Working Conditions	17	Against	Against	No	We do not believe that what this proposal is asking for would be additive to existing disclosures. We believe the company's disclosures on working conditions are among the most comprehensive in the industry.

Coupang, Inc.	USA	Annual	13-Jun-24	Management	Board election & structure	Elect Director Bom Kim	1a	For	For	No	We believe Mr Kim has played an absolutely central role as founder in scaling up Coupang to become the largest e-commerce player in Korea. He has proven to be a highly skilled operator and we are comfortable with him having the control over voting at this stage of the company's development. However, we would like to see Coupang adopt a reasonable time-based sunset provision on dual class shares.
Coupang, Inc.	USA	Annual	13-Jun-24	Management	Board election & structure	Elect Director Neil Mehta	1b	For	Against	Yes	Voting against Governance Committee members as we would like to see Coupang adopt a reasonable time-based sunset provision on dual class shares.
